My handle is JACK and I have been a continuously active and a proponent of Amateur radio and was first licensed in 1959 with the call KN3IHA. I upgraded to Technician in 1960 and was issued the call K3IHA. When I moved to Linwood NJ in 1974 I was issued a secondary License of WB2ASB which was dropped after 3 years.

My wife Betty call is WB2JBM and we have two sons David (KB2JBS) and Alan (no call). My hobby was the foundation for my career in Electronics which includes working for American Electronics Labs, a subcontractor for NASA on part of the Apollo 11 Project. I then moved from equipment design into the computer world with RCA Computer Systems Div., then to Sperry Rand Univac. I then went back to Radio Communications Engineering with Motorola C&E Inc. working with system Design, product improvement, and system integration for 29 years. In 2002 I retired from Motorola after 29 years. I started my own communications business and now primarily subcontract to Bird Electronics Corp working with RF communication path studies for Digital and Analog system design & integration.

I am active on VHF, UHF, and HF fixed and mobile. My interests include ATV, Packet, Flying, Automobile Racing and computers. I enjoy constructing my own equipment in the past it was a ground up construction but now the technology and source of parts has forced me to become a system integrator finding new ways to make hardware do new tricks. I am a member of the Southern Counties Amateur Radio Assoc. (SCARA) club Call (K2BR). Please visit our club site via URL: [www.qsl.net/k2br/](http://www.qsl.net/k2br/) OR <http://mysite.verizon.net/vzepb0rn/>
